

Research Grant Awarded to Fierro

We're very excited to announce that Fernando Fierro of the University of California, Davis has received a \$54,774 Million Dollar Bike Ride research grant award for his project: Skeletal stem cells to treat the bone defects of patients with Snyder-Robinson Syndrome.

We'd like to congratulate Fernando, and thank him and his entire research team for helping us find a treatment for SRS! We'd also like to thank the Penn Medicine Orphan Disease Center, Team SRS! and all of our generous donors for making this possible!
